

## AK Ramon TS-300

### Automated Tray Sealer

The TS-300 is a compact and efficient automated tray sealer, providing consistent sealing quality for optimal food safety and freshness.

The reliable seal prevents any leakage of liquid or sauces when transporting food in trays. It also creates consistent, attractive packaging to improve your product merchandising and appeal to customers.

With multiple die sets available which are quick and easy to change in seconds, the TS-300 can be used with various tray sizes and materials, making it a flexible solution for all your fresh, frozen, or ready-to-eat foods.

The user-friendly control panel easily adjusts sealing time and temperature. The machine automatically advances the film, seals it, and cuts it around the perimeter of the tray.

Boasting a robust and hygienic stainless steel construction, the TS-300 is durable and easy to clean. Its ergonomic and compact design is ideal for food production facilities with limited space.

### Specifications

**Body Material:**

AISI 304 stainless steel

**Die Set Material:**

Anodized aluminum

**Voltage:**

220v  
Single phase  
50-60 Hz
